

VISCA & DMX Connectivity

AJA • ARRI • Blackmagic • Canon • GoPro
JVC • Marshall • Panasonic • RED • Sony

PTX Universal PanTilt heads are compatible with VISCA and DMX controllers, integrating pan and tilt functionality with available camera control parameters.

For DMX control

Connect to the heads using standard three-conductor XLR cables, and download the published PTX Profiles that let you integrate the PTX fixtures into your lighting universes.

CONTROLLER

DMX
CONSOLES
&
SOFTWARE

Use standard XLR microphone cable for DMX IN and OUT.

Set the DMX ID DIP swx to match the ID number you set for the fixture using the menu on the front panel of the PTX.

Download the **DMX / DIP SWITCH CALCULATOR** on the PTX page of the RUSHWORKS website: www.RUSHWORKS.tv

MODE SWX		
SW	ON	OFF
1	VISCA	DMX
2	VISCA	L/P
3	38400	9600
4	422/485	232
5	422	485
6	NORM	FW

MODE SWX FUNCTIONS

- 1 Sets the **CONTROLLER** device type
- 2 Identifies the **CAMERA** device type: (VISCA or LANC/Panasonic Remote)
- 3 Sets the BAUD rate of the connected camera (if Camera is VISCA)
- 4 Sets the serial communications protocol the VISCA camera requires
- 5 If SW4 is 422/485, select which protocol the camera requires
- 6 Set this to FW for firmware upgrades

For VISCA control

Connect to the heads using a 9-pin Phoenix connector on CAT5 or similar cable. The PTX heads use RS422 full-duplex communications protocol from the controller.

Connecting your Camera to the PTX

PTX-to-camera control connections are available on the HD15 connector on the arm of the fixture. Use the information on the right to configure the appropriate short cable from the HD15 to your camera.

Cables can also be ordered from RUSHWORKS. These support camera connections using RS422, RS232, RS485, LANC and Panasonic Remote.

HD15
OUT

- | | | |
|---------------------------|--------------|----------------|
| 1 = PANA Rec Start/Stop | 6 = Ground | 11 = LANC Data |
| 2 = PANA Zoom | 7 = 422 TX+ | 12 = 232 TX |
| 3 = PANA Iris Auto/Manual | 8 = 422 TX- | 13 = 232 RX |
| 4 = PANA Iris | 9 = 422 RX+ | 14 = none |
| 5 = PANA Focus | 10 = 422 RX- | 15 = none |
